Hold Each Other — *A Great Big World*

LYTALINA-fied

[Intro] **C#m E A E (X2)**

[Verse 1] **C#m E A E (X4)**

I miss the words we used to say
I miss the sounds of yesterday
I miss the games we used to play
Like, ohhh

I was trapped inside a dream
I couldn't see her next to me
I didn't know she'd set me free
Like, ohhh

[Chorus] **C#m E A E (X5)**

Something happens when I hold her
She keeps my heart from getting older*
When the days get short and the nights get a little bit colder*
We hold each other, we hold each other
We hold each other, mmmmm

[Verse 2] **C#m E A E (X4)**

Everything looks different now
All this time my head was down
He came along and showed me how
To let gooo

I can't remember where I'm from
All I know is who I've become
That our love has just begun
Like, ohhh

him

[Chorus]

**broken/frozen*

[Instrumental] (X4)

them

[Chorus]

**broken/frozen*

We hold each other We hold each other We hold each other Mmmmm
